EDUCATION

Universitat Jaume I

B.Sc. in Robotic Intelligence

Focus on Autonomous Robotics, Computer Vision, Kinematics, Machine Learning, and Real-Time Systems.

Castellón, Spain

Sept 2021 – July 2026

TECHNICAL SKILLS

Languages: Python, C++, Bash/Shell, SQL (SQLite), MATLAB, Verilog

Robotics & Vision: OpenCV, MediaPipe Tasks, PyBullet (URDF, Inverse Kinematics), Pygame, ROS2

AI & Machine Learning: Ollama, Claude API, Claude Code, RAG, Scikit-learn, PyTorch, Hugging Face

Tools & Cloud: Playwright, Scraping, BeautifulSoup, AWS EC2, Git, Linux, Pandas, L^AT_EX

Spoken Languages: Spanish (Native), Valencian (Native), English (C1 Advanced - Cambridge)

WORK EXPERIENCE

Digiole Oy

Machine Learning Intern (Erasmus+ Traineeship)

Helsinki, Finland

Feb 2026 – June 2026

- Developed and shipped an autonomous end-to-end B2B outbound lead generation pipeline integrating Google Maps API, Playwright, and Scraping for high-throughput business qualification.
- Deployed local LLM workflows via **Ollama** coupled with deterministic templating to automate context-aware outreach email generation with zero token cost.
- Built an autonomous strategic assistant MVP featuring persistent state handling (**SQLite**), **RAG** contextual memory retrieval, and scheduled report dispatching.
- Benchmarked agentic software engineering tools (**Claude Code vs. Codex, OpenClaw**) on **AWS EC2** instances and assessed edge AI execution on constrained hardware.

ENGINEERING PROJECTS

Lightweight Gesture-Driven Robotic Digital Twin | *Python, OpenCV, MediaPipe, PyBullet, Pandas*

- Designed a contactless human-robot interface (HRI) running in real time on low-end consumer CPU hardware without wearable sensors or depth cameras.
- Formulated a 5-frame consecutive debounce filter (*confidence* ≥ 0.6) over **MediaPipe Tasks** gesture predictions, suppressing classifier flutter and false triggers.
- Implemented a **PyBullet** 3D digital twin of a 7-DOF Franka Panda arm controlled via bounded numerical inverse kinematics across dual Cartesian control planes (X-Z / Y-Yaw).
- Benchmarked 24,300+ frames using a non-blocking queue logger, demonstrating an average throughput of **23.79 FPS** and a mean processing latency of **17.47 ms**.

CERTIFICATIONS & OTHER

Cambridge Certificate in Advanced English (C1) | Anthropic Claude 101 | Valid Driver's License (B)
